

Senior Software Engineer

Bravo LT needs you to be a part of our highly motivated group of technology experts. We share a passion for technology and the community we serve, and we are committed to building long-lasting, productive relationships. We focus on giving back to the community, positively impacting society, and providing quality solutions that work. We believe in *autonomy*, *mastery* and *purpose* and in trusting people to do the right thing - and we think Bravo LT is a pretty great place to be a part of.

The Bravo LT Software Developer possesses a deep understanding of the analysis, design, implementation, testing, and maintenance of web applications. A strong foundation in computer science, the object-oriented languages (i.e., Java and C#) and modern technologies are required.

Responsibilities

- Translate business requirements and user stories into functional applications
- Develop code in object-oriented languages, such as C# and Java
- Work with SQL, Oracle PL/SQL, stored procedures, functions, and performance tuning
- Work in a team-based, collaborative environment following sound Agile principles
- Interprets user stories and converts them into usable features
- Uses a variety of software development toolkits, programming languages, testing/verification applications and other tools, while adhering to specific development best practices and quality standards
- Design, build, test, and maintain reusable and reliable code
- Mentor junior and intermediate developers
- Ensure the best possible performance, quality, and responsiveness of the applications
- Identify and devise solutions to problems with functionality or performance of the applications
- Help maintain code quality, organization, and automation

Basic Qualifications

- Bachelor's degree or master's degree in Computer Science or related field
- Three or more years of experience developing software
- Solid understanding of object-oriented software design and related patterns
- Experience with relational databases and SQL
- Strong interpersonal and communication skills and the ability to interact with a diverse group of clients and colleagues at a high degree of professionalism
- Able to manage time effectively

Preferred Qualifications

Desired experience with (not required):

- Containerized cloud environments, including Docker, GCP, and Kubernetes
- Experience with streaming architectures, such as Kafka
- Using web application frameworks, such as Angular, Ember, or React
- Working in a large organization/enterprise environment
